

February 25, 2016

Gettysburg College is proud to have embarked on a car-sharing program with Zipcar, Inc. This endeavor provides many opportunities for the college, not the least of which is to accomplish a sustainability initiative.

Car sharing provides a module of travel for faculty, staff, and students so that individuals do not find it necessary to bring personal vehicles to campus, avoiding many instances of long-distance individual travel. It also creates an opportunity for individuals to share expenses and travel together on hourly or daily trips. This effort reduces our carbon footprint and congestion.

This new service line compliments our already existing services that foster environmentally friendly travel options for our community including airport shuttles and group travel.

Sincerely,

Margaret E. Baldwin
Assistant Director of Facilities for Transportation, Service and
Communication
