STARS Steering Committee
Association for the Advancement of Sustainability in Higher Education
1536 Wynkoop Steet, Suite 100
Denver, CO 80202

To whom it may concern:

I am pleased to submit this letter of affirmation that the information presented for credit IN-1 is complete and accurate to the best of my knowledge. Saint Louis University strives to be innovative in many of its endeavors and the example submitted is no exception. This sustainability project, **Managed Print Services (MPS) Blue Prints Program** is truly unique and innovative in the St. Louis region due to its centralized printing strategy.

My role in Facilities Services keeps me involved in establishing sustainability goals for the division and university, with particular focus on waste diversion and energy consumption on campus. The MPS program is an innovative initiative that will assist with meeting goals in both of those areas. It is encouraging to see how sustainability is being integrated into other divisions across campus with partnerships forming among Business and Finance, Information Technology Services and Facilities Services.

Sincerely,

Chris Regan
Associate Vice President of Service Operations
Division of Facilities Services
Saint Louis University
