To Whom it May Concern,

The Stark County Education Network for Environmental Sustainability (SCENES) website was created to:

- build a conversation around locally relevant sustainability issues,
- provide resources to engage people from all walks of life,
- connect people ready to envision a sustainable community, and
- realize this vision through partnerships and collective action.

This virtual communication resource provides a platform for conversation, information on local sustainability issues, resources for educational opportunities and curriculum development, a Green Business Roundtable, local food maps, links to connect people through a green directory, an event calendar, volunteer project exchange, and a forum for community sustainability. This dynamic, evolving website continually strives to reflect the needs of the surrounding community.

The website can be accessed at: [www.starkscenes.org](http://www.starkscenes.org).

Thank you for your consideration.

Best regards,

Stefanie A. S. Smith, AIA, LEED AP BD+C  
Sustainability Coordinator and Green Building Consultant
