To whom it may concern,

It is my pleasure to write in support of the innovation project in relation to Energy Display Dashboards within residence buildings. I can confirm that this project has enabled Housing and Residence Life to track and engage student residents on energy use and also foster a broader culture of sustainability. Linking the data to targeted programs and competitions, through our Green Team program, has further enabled engagement and information to be shared.

Sincerely,

Laura Storey
Director, Housing and Residence Life
